

F Raw Material Order Plan

How the order cycle works:

- 1. Batches you plan to produce (from the Formulate tab) appear here as a checklist.
- 2. Tick the batches you want to order materials for — the table shows exactly what to buy.
- 3. Export the purchase order CSV and send to your supplier.
- 4. When materials arrive, click Mark Order Received to update your stock.
- 5. Return to the Production tab and Commit the planned batch to begin production.

If the table shows In Stock for all materials, stock is already sufficient — go commit the batch directly.

STEP 1 – SELECT BATCHES TO INCLUDE IN THIS ORDER

Select all Clear all

20260730-001-EP0-TER

Epoxy Two-Part Floor Coating · Terracotta · 304.5 kg · Est. batch cost: RWF 432,778.20

STEP 2 – AGGREGATED PURCHASE ORDER

1 batch selected · Total planned production: 304.5 kg
